

Lepidoptera Traits

Your insectoid heritage manifests in a variety of moth-like traits you share with all other lepidoptera.

Ability Score Increase. Your dexterity score increases by 2, and your intelligence score increases by 1.

Age. Lepidoptera mature at the same rate as humans, but often lead far shorter lives, rarely exceeding the age of 60.

Alignment. Lepidoptera tend to stray from extremes, favoring no particular alignment. They are most often true neutral, following their whimsy wherever it may lead.

Size. Lepidoptera are between 4 and 5 feet tall and average around 80 pounds. Your size is medium.

Speed. Your base walking speed is 30 feet.

Flight. You have a flying speed of 25 feet. To use this speed, you can't be wearing medium or heavy armor.

Darkvision. Accustomed to nocturnal life in dark forests, you have superior vision in dark and dim conditions. You can see dim light within 60 feet of you as if it were bright light and in darkness as if it were dim light.

Speak With Insects. Through sounds and gestures, you can communicate simple ideas with insects that are Small or smaller.

Commune With The Forest. You gain proficiency in the Nature skill.

Languages. You can speak, read, and write Common, Sylvan, and Undercommon.
